Student Class Data Collection

Delivery Models Document

This spreadsheet summarizes how the four ‘Delivery Model’ data elements in Student Class, which describe how special instruction or service is delivered to individual students in a class, should be coded. For the In-Field application, this is a brief summary of how the data from Student Class is used. In general, the **COURSE TEACHER CODE** in SC, will be evaluated on the content of the course which comes from the first two digits of the **COURSE NUMBER**. If there is a Delivery Model indicated on a course record for a student, and the Delivery Model requires that the service is delivered by an additional teacher or other personnel, as indicated in the ‘Additional Teacher’ column, then the In Field application will look for the **ADDITIONAL COURSE TEACHER CODE 1** to be qualified in the service.

There are several guiding principles for delivery of these services:

A teacher can deliver content and a service at the same time. For example, a teacher can deliver Life Science content and modify the delivery to serve some gifted students in the class. A teacher cannot deliver two services in the same classroom, such as ESOL and gifted services.

A teacher cannot be listed as the primary / content teacher (the **COURSE TEACHER**) and as the **ADDITIONAL COURSE TEACHER 1, 2, or 3**.

The focus of service and the FTE funding of that service needs to be for an appropriate amount of time, specified by State Board Rule or program specific guidelines. A student should not be scheduled to receive two services at the same time so there should not be two different delivery models on the same class record for a student.

Note: The information provided in this document was developed to assist with coding data for Student Class. It does not replace or override any documentation provided by the program area.

NEW in January 2021

In this document, we have added the error codes that test the integrity of the element. These are noted in (blue). These error codes are listed in the [Student Class layout](#) but are now cross-referenced here. The text that is highlighted in yellow was added at the beginning of this school year, 2020 - 2021. Anything highlighted in grey was added in January 2021.
